EDUCATION

Navrachana University

Bachelor of Technology – Computer Science and Engineering; CGPA: 7.62/10 (up to Sem VI).

Vadodara, Gujarat, India

2023 – 2027

Navrachana University

Minor Degree – Mechatronics.

Vadodara, Gujarat, India

2023 – 2027

EXPERIENCE

Freelance Web Developer (Travel Agency Client)

June 2026 – Ongoing

- Undertaking a freelance web development project for a travel agency client, managing requirements, design, and development.

Hackathon Participant (MeshWorks (US-based) Company-Sponsored Hackathon)

- Participated in a company-sponsored hackathon, contributing to a smart web scraping solution for real-time supplier price discovery.

PROJECTS

Walleto (Python, Node.js, React, MongoDB, Gemini API, WhatsApp Business Cloud API)

Aug 2025 – May 2026

- Developed an AI-driven CRM integrated with the **WhatsApp Business Cloud API** to automate customer interactions for small businesses, featuring real-time message categorization, analytics, and a chatbot assistant.
- Integrated the **Gemini API** to generate personalized marketing messages and promotional images shared directly through WhatsApp.
- Built a Python ML **model trained on 55,000+ customer messages** for automated message classification and a Node.js backend with real-time MongoDB sync; React dashboard provides analytics.
- Designed the mobile frontend enabling entrepreneurs to manage customer interactions on the go, **reducing manual response effort by approximately 60%** for small-scale businesses.

HireFlow (Python, Flask, React, MongoDB Atlas, JobBERT, EasyOCR)

Feb 2026 – May 2026

- Contributed to building an AI-powered resume ranking platform using a hybrid pipeline combining JobBERT embeddings and TF-IDF keyword matching **for semantic similarity search** — conceptually aligned with vector retrieval pipelines to generate composite relevance scores against job descriptions.
- Worked on the Python (Flask) backend for resume parsing from PDF, DOCX, and scanned images using PyMuPDF and EasyOCR, and integrated **MongoDB Atlas** for persistent candidate storage and live analytics.
- Helped develop the React dashboard enabling recruiters to upload bulk resumes, view ranked candidates, and explore hiring analytics.
- Ranked 500+ resumes** against JDs using JobBERT embeddings and TF-IDF **trained on 5,000+ resumes with 89% accuracy**.

SocietEase (Java, Servlets, JSP, MySQL, Apache Tomcat, Docker, Railway)

Feb 2026 – May 2026

- Built and deployed a full-stack Java web application for residential society management using Java Servlets and JSP, MySQL, and Apache Tomcat — live at societEase.online.
- Implemented dedicated modules for residents, committee members, and administrators covering complaints, maintenance tracking, payment records, and announcements.
- Migrated deployment from Railway to **Oracle Cloud Infrastructure (OCI)**, with the database hosted on **Aiven** — handling server provisioning, WAR deployment, DNS configuration via GoDaddy, and SSL/HTTPS setup end-to-end.

Chess (Flutter, Dart, Stockfish Engine)

Aug 2025 – Nov 2025

- Designed and developed a cross-platform chess game mobile application using Flutter and Dart, enabling intuitive, **interactive play** on Android devices.
- Engineered core chess logic including move validation, check/checkmate, and special rules (**castling, en-passant, pawn promotion**).
- Integrated the Stockfish Chess Engine** to implement a **Player vs. Computer** mode with multiple AI difficulty levels.
- Implemented a polished UI/UX with scalable SVG graphics, smooth animations, custom themes, and robust game state persistence with local storage.

AWS Academy Data Engineering | [Credly Badge](#)

2026

TECHNICAL SKILLS

Data & Analytics: Python, Pandas, NumPy, SQL, Excel

AI / ML: JobBERT, TF-IDF, Gemini API, EasyOCR, PyMuPDF

Frameworks: React, Node.js, Express.js, Flask

Databases: MySQL, MongoDB, MongoDB Atlas

Tools: Git, GitHub, VS Code, Docker, Android Studio

APIs & Platforms: WhatsApp Business Cloud API, Claude API, RazorPay API
