🔧 PROFILE

Computer science student with a genuine interest in building end-to-end software that solves real problems. My work spans mobile development, full-stack web applications, and practical AI/ML integration. I enjoy the challenge of connecting different technologies into something that actually works, and I'm looking for an opportunity where I can contribute meaningfully, keep learning, and grow alongside a team that takes their craft seriously.

🧠 TECHNICAL SKILLS

Programming Languages: [C • Python • Java • HTML • CSS • JavaScript]

Frameworks & Libraries: [Flutter • React • Node.js • Express.js • Flask • EasyOCR • PyMuPDF]

Databases & Tools: [MongoDB • MySQL • Git • GitHub • VS Code • Android Studio • Jira • Docker]

APIs & Platforms: [WhatsApp Business Cloud API (Meta) • MongoDB Atlas • GeminiAPI • RazorPay API]

Soft Skills: [Problem-solving • Logical thinking • Teamwork • Communication]

👤 PROJECTS

AI-Powered WhatsApp CRM System

August 2025 – May 2026

- Developed an **AI-driven CRM** integrated with the **WhatsApp Business Cloud API** to automate customer interactions for small businesses, featuring **real-time message categorization, analytics, and a chatbot assistant**.
- Integrated the **Gemini API** to generate personalized marketing messages and promotional images that can be shared directly through WhatsApp.
- Built a **Python ML model (trained on a dataset of 55,000+ customer messages)** for automated message classification and a **Node.js backend** with real-time **MongoDB sync**; **React** dashboard gives business owners a clean view of **conversations and analytics (39+ git commits)**.
- Designed the **mobile frontend** enabling entrepreneurs to manage customer interactions on the go, reducing manual response effort by **approximately 60%** for small-scale businesses.

HireFlow — AI-Powered Resume Ranking & Analytics Platform

February 2026 – May 2026

- Contributed to building an **AI-powered resume ranking platform** that scores candidates using a hybrid pipeline combining **JobBERT embeddings and TF-IDF keyword** matching to generate a composite relevance score against a given job description.
- Worked on the **Python (Flask) backend** for resume parsing from PDF, DOCX, and scanned images using **pymupdf and EasyOCR**, and integrated **MongoDB Atlas** for persistent candidate storage and live analytics.
- Helped develop the **React dashboard** enabling recruiters to upload bulk resumes, view ranked candidates, and explore hiring analytics — significantly reducing manual screening effort (**60+ git commits**).
- Ranked **500+ resumes** against job descriptions using JobBERT embeddings and TF-IDF trained on **5000+ resumes with 89% testing accuracy**.

Flutter Chess App for Android

August 2025 – November 2025

- Designed and developed a **cross-platform chess game** mobile application using **Flutter and Dart**, enabling intuitive, interactive play on **Android devices**.
- Engineered **core chess logic**—including move validation, check/checkmate, and **special rules (castling, en-passant, pawn promotion)**.

- Integrated the **Stockfish Chess Engine** to implement a **Player vs. Computer** mode with **multiple AI difficulty levels**.
- Implemented a polished UI/UX with scalable **SVG graphics for chess pieces**, smooth animations, and custom themes, supporting robust game state persistence with local storage.

SocietEase

Jan 2025 – April 2025

- Built and **deployed a full-stack Java web application** for residential society management using Java Servlets and JSP for the backend, MySQL for data storage, and Apache Tomcat as the server — live at societEase.online.
- Implemented dedicated modules for residents, committee members, and administrators covering complaints, maintenance tracking, payment records, and announcements across **multiple user roles**.
- Deployed the application on **Railway** with a custom domain via **GoDaddy DNS**, handling Dockerfile configuration, WAR deployment, and SSL/HTTPS setup end-to-end.

CERTIFICATIONS

AWS Academy Machine Learning Foundations 2026
 Credentials - [Credly Badge](#)

AWS Academy Cloud Foundations 2026
 Credentials - [Credly Badge](#)

AWS Academy Data Engineering 2026
 Credentials - [Credly Badge](#)

EDUCATION

Bachelor of Technology – Computer Science and Engineering (2023 – 2027)

Navrachana University, Vadodara, Gujarat, India

CGPA: 7.62 / 10 (up to Sem VI)

Minor Degree – Mechatronics (2023 – 2027)

Navrachana University, Vadodara, Gujarat, India

ACHIEVEMENTS

- Built 4+ full-stack and mobile applications.
- Contributed 100+ Git commits across collaborative projects.
- Earned three AWS Academy certifications in Cloud, Machine Learning, and Data Engineering.
- Participated in a MeshWorks (US-based) company-sponsored hackathon, contributing to a smart web scraping solution for real-time supplier price discovery.
- Deployed a full-stack Java web application to production with a custom domain — societEase.online — handling end-to-end cloud deployment independently.
- Undertaking a freelance web development project for a travel agency client, managing requirements, design, and development independently.
